OUR PRODUCTS

A1 eSpace

Space management platform which automates operations of single spaces and multi-location brands.

A1 CRM

A platform for automating document, employee management processes and credit scoring.

A1 eLis

An information system for optimizing and automating laboratory operations management and more.

A1 eConstruction

A solution for automating construction management focused business processes.

OUR PRODUCTS ADVANTAGES

1

Interface Tailored to Company's Branding.

A fully customizable interface designed to align with your company's unique branding, including logos and color schemes for a seamless, personalized experience.

2

Robust Security and Data Protection.

Implement top-tier security features such as encryption, multi-factor authentication, and regular backups to protect user data and resources, fostering trust and compliance with privacy regulations.

3

License-Free Usage and Discount for Tech Support

We offer a one-time purchase model, allowing you to own and use the system indefinitely without the need for recurring license fees, providing long-term value and flexibility.

4

Easy and Imidiate Access to the Product

It is a web-based product, meaning there is no need for any installations or downloads. A standard web browser gives access the platform with just an internet connection.

5

Unlimited Ability to add Staff and End-users

Whether it is a small team or a large organization, eLibrary can accommodate an unlimited number of admin users and end users, giving the flexibility to grow without constraints.

6

Regular Software Updates and Top-Ups.

The software is regularly updated for clients with a tech support contract, and AI also offer the option to add new modules and enhance the product over time to meet evolving needs.
