

Minora AI – AI platform for full-funnel marketing operations

Minora turns market context into paid demand and organic visibility across global channels.

Global demand is not the problem. Execution is.

Channel access

Google and Meta are essential abroad, but unavailable inside China and many other markets.

Market context

Global platforms do not provide the local insight needed to enter a new market.

Operational memory

Research, approvals and performance live in different tools and disappear after launch.

From market context to growth execution.

Minora is the intelligence and operations layer before, during and after a campaign.

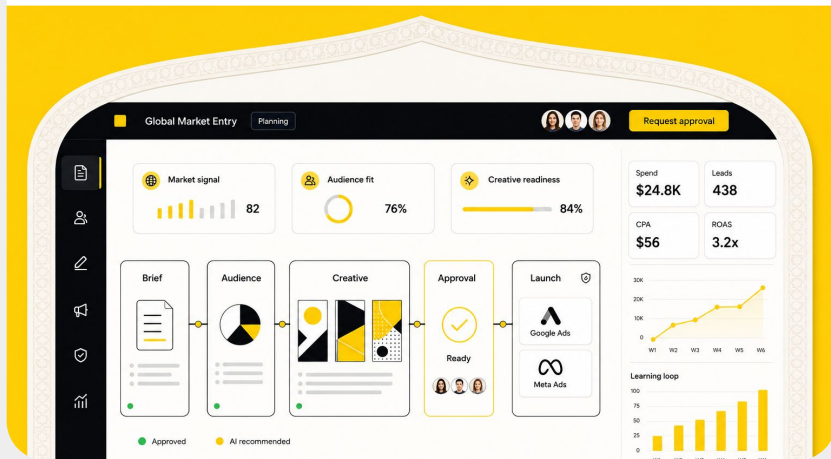

Two growth engines. One operating system.

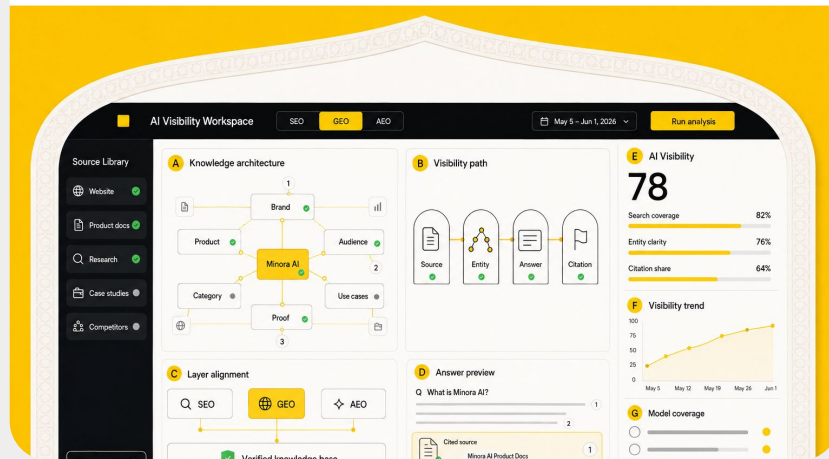

Paid Ads

Strategy, creative, activation and optimization for Chinese teams expanding abroad.

AI Visibility

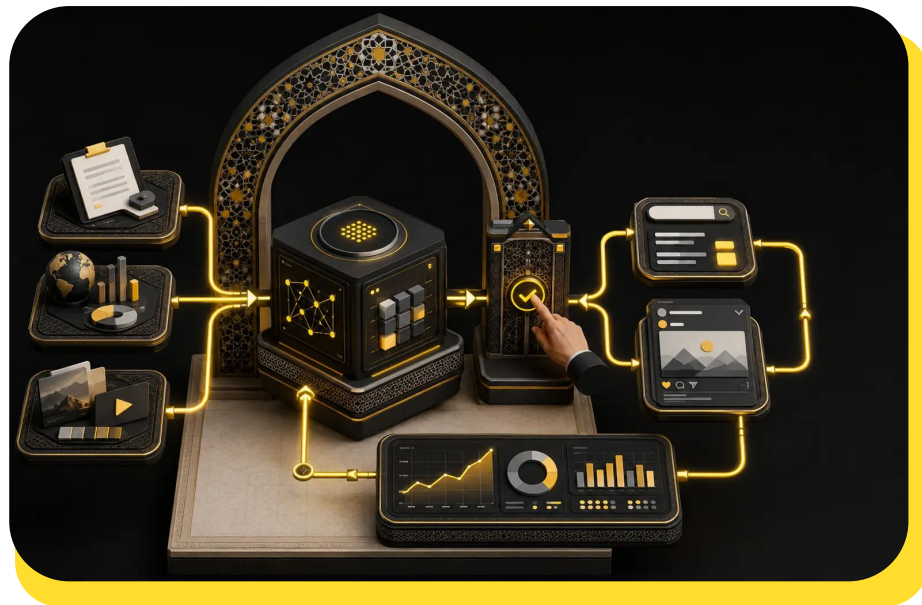

Organic discovery and LLM citations for B2B tech brands entering new categories.

Paid media without the cross-border blind spot.

Minora combines local market intelligence, global channel execution and human approval in one campaign workspace.

Product 1

Local insight

Global activation

Reusable learning

Evidence in. Decisions out.

30 min

Human

Approval At Key Gates

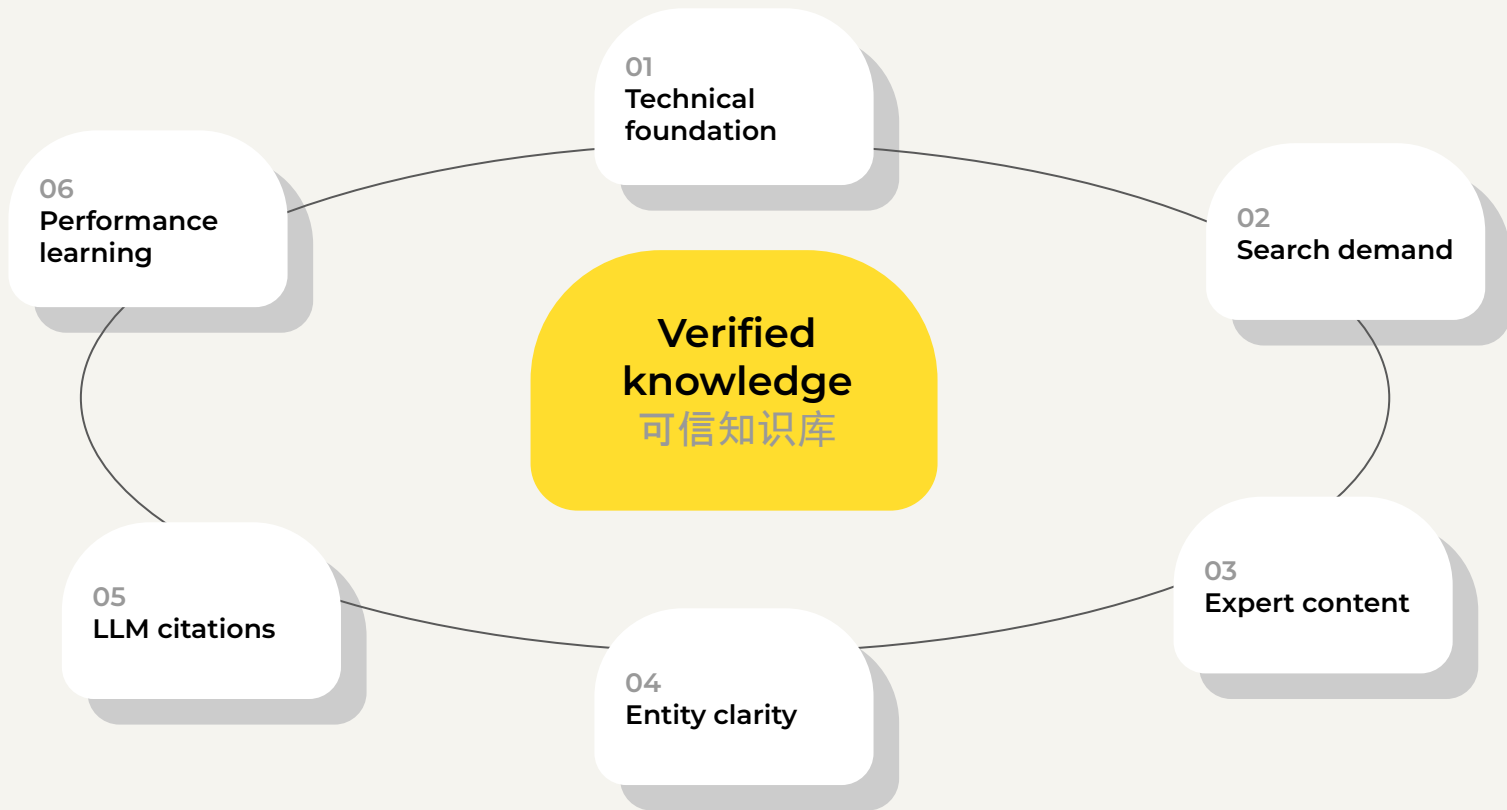

Product 2

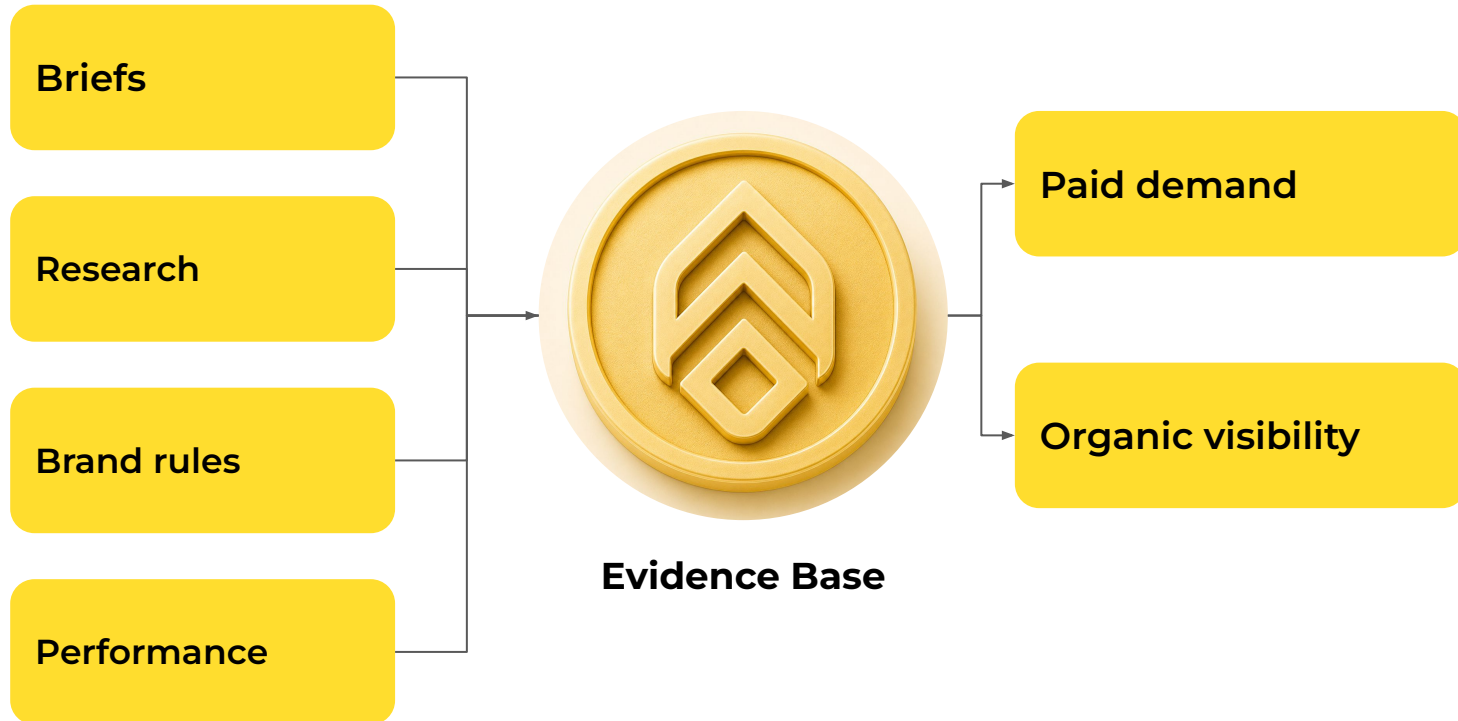

**Become discoverable in
search and AI answers.**

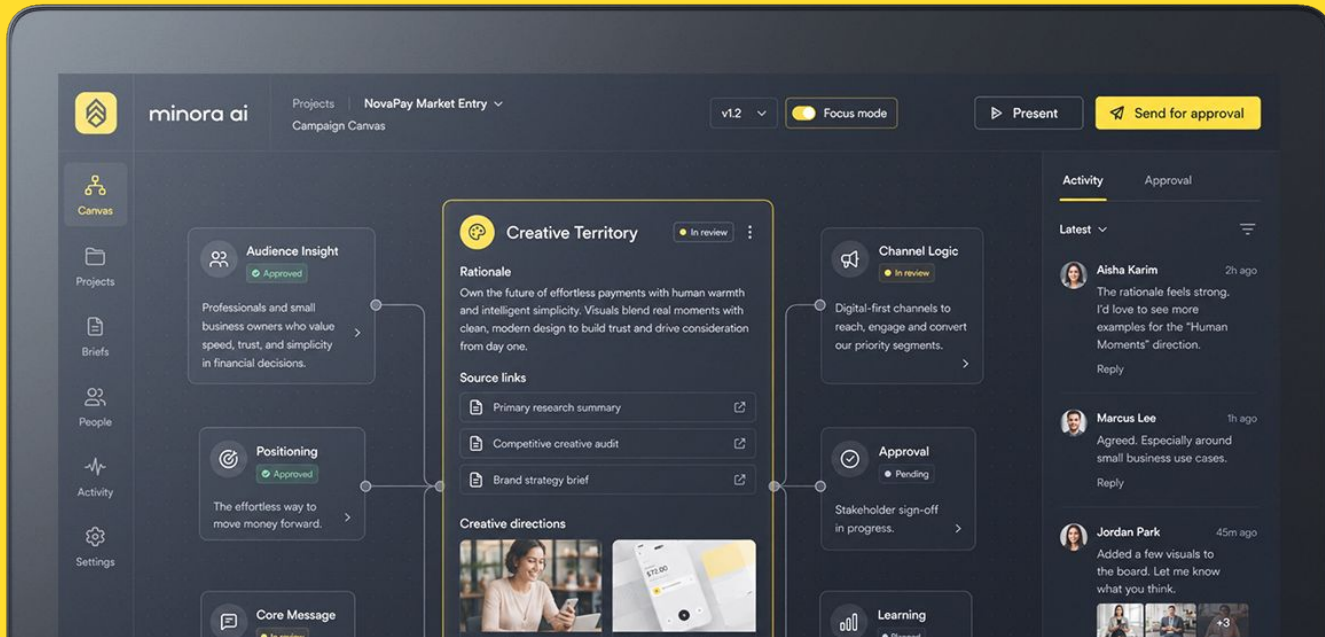

SEO captures demand. GEO structures meaning.
AEO earns the citation.

Build authority once. Compound it everywhere.

One evidence base powers both engines.

**Ask the evidence.
Build the strategy.**

Source-grounded answers keep strategy,
assumptions and open questions separate.

AI moves the work. Humans own the decision.

AI agent

Researches, structures
and drafts.

Evidence check

Every recommendation
traces to a source.

Human gate

Strategy, creative and
budget require approval.

Learning log

Every decision improves
the next campaign.

A practical bridge to new markets.

Built in Uzbekistan. Shaped by Central Asian market execution. Designed for international growth teams.

Designed for speed, control and learning.

Faster learning cycle

Four paths to work with Minora.

Growth Teams

Enter international markets with local context and global channels.

Agencies

Add an AI campaign operations layer to client delivery.

B2B Tech

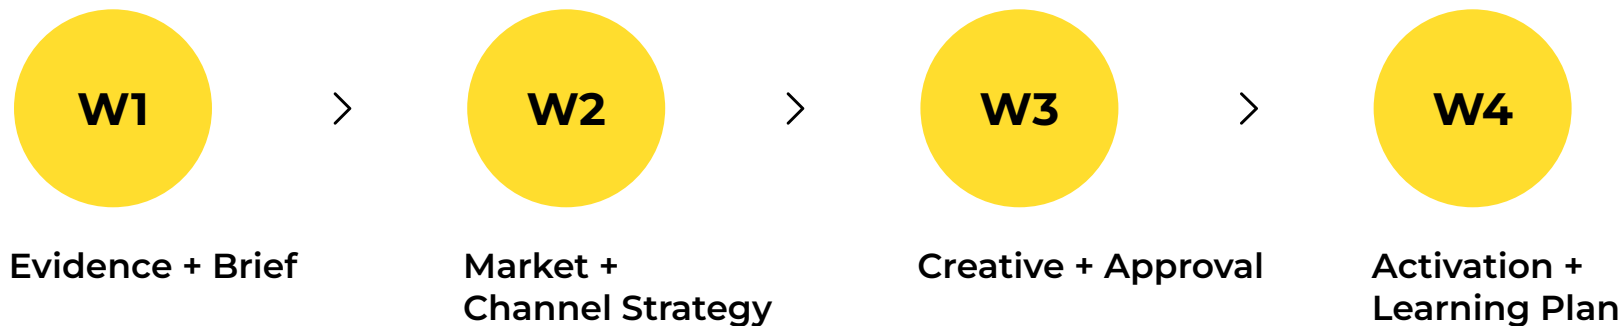

Build search authority and AI visibility in new categories.

Partners + Investors

Scale a market-entry platform built at the China-Central Asia corridor.

A 30-day market-entry pilot.

Output: Market-entry campaign system, ready for activation.
